Lisa Mentele handed out a packet of pictures that she went over showing the location and views with the 10’ addition. She stated she has not been able to get a contractor over to her place until the variance is approved. Without the variance a 7’ addition could be built but would not allow her to recess the front door like she would like. She asked for a few feet more just in case the contractor needed the extra room to build the addition and have an overhang on the front. Osterloo questioned if an addition could be done on the back and the applicant stated there is

already a deck built back there and it would be costly to tear out and build new, also it would not help with protecting the front entry way from the weather conditions.
